## Immersion Temperature Sensors

**QAE3010...**  
**QAE3075...**

### Use

The sensors are used for acquiring the temperature of liquid or gaseous media (e.g. heating water) in heating, ventilation or air conditioning plants. They are designed for use in connection with automation equipment, display and logging devices.

## Ordering

When ordering, please give name and type reference according to "Type summary", e.g. immersion temperature sensor **QAE3010.010**

## Mechanical design

The sensor consists of an exchangeable insert with sensing element and connecting head with a removable cover made of aluminum. The inserts are not available as replacement parts, but can be removed from a new sensor with the identical apparatus item number (ASN).

The terminal block for the electrical connections is located in the connecting head. The sensors have a 70 mm neck tube made of stainless steel and a G ½ threaded bushing with sensor sleeve. The sensing element is located at the end of the sensor sleeve. The sleeve is suited from operating pressures up to 40 bar.

## Disposal

The devices are considered electronics devices for disposal in term of European Directive 2012/19/EU and may not be disposed of as domestic waste.

- Dispose of the device via the channels provided for this purpose
- Comply with all local and currently applicable laws and regulations.
